

BIO

Christopher M. Bauder

ABOUT

Christopher M. Bauder (1973) started creating large scale spacial art installations and lighting designs after finishing his studies in the Digital Media Class at the Berlin University of the Arts. His projects focus on the translation of bits and bytes into objects and environments and vice versa. Space, object, sound, light and interaction are the key elements of his work.

In 2004 he founded the multidisciplinary art and design studio WHITEvoid as a necessity to realize his large scale art and design pieces and environments. The studio is comprised of specialists in interaction design, media design, product design, interior architecture and electronic engineering.

Christopher Bauder has brought installations and performances to events and spaces like the Centre Pompidou in Paris, MUTEK Festival in Montreal or The National Museum of Fine Arts in Taiwan. His projects have received worldwide recognition and have won several awards including multiple Cannes Lions, the German Lighting Design Award, the Design Award of the Federal Republic of Germany, the Reddot Design Award and the iF Communication Design Award.

Christopher Bauder lives and works in Berlin.

CV
